

# Decorating canvas shoes with Playcolour Textil sticks and Derwent Graphik Line Painters

These easy to use sticks and pens are ideal for colouring any textile material, like canvas shoes.

Using a stencil brush take some colour from the tip of the stick and brush directly onto the fabric.

Alternatively, you can place a stencil over the fabric and brush over the stencil to create designs.

For a solid coloured look, you can draw with the sticks directly onto the fabric.

For outlining your designs, use Derwent Line painters which create fine lines with their unique style nib that allows the paint to run freely.

Heat set the colours by ironing for 2 minutes .

For items that you can't iron blow dry for 5 minutes.
