

Glitter Transfer Sheets

These easy to use Glitter transfer sheets will add glitz to your textile piece. They are available in 10 stunning colours of A4 sheets.

Step 1. Cut out your shapes/designs from the glitter transfer sheets shiny side up. The shiny side has a plastic film over the glitter which allows you to draw a design and then cut it out without affecting the sheet underneath.

Step 2. Pre iron the fabric you are going to be using.

Step 3. Place your glitter transfer designs shiny side up on the fabric and cover with baking paper.

Step 4. Iron for approx..1 minute on the cotton setting (no steam)

Step 5. Remove the baking paper and peel off the plastic film from the top of the glitter transfer. If it doesn't peel off easily, replace the baking paper, and iron for another minute.

Step 6. Once all the plastic film is removed, cover with the baking paper again and iron for another minute , to complete the fixing process.
