

# JACQUARD INKJET FABRICS

Jacquard Inkjet fabrics are a pre treated fabric sheet for creating images using inkjet printers. They are available in silk, cotton and silk organza.

Do not use with laser printers.

Ideal for memory quilts, labels, textile art and fabric scrap books.

Turn your fabric designs into permanent washable creations while maintaining the natural feel of the fabric.

This can be done in 4 easy steps.

## How To

**STEP 1.** Create an image or photograph using your computer, digital camera or scanner. Set printer to thick, matte or heavy paper.

**STEP 2.** Place fabric sheets in your printer tray and print the design on the fabric side.

**STEP 3.** Remove paper backing from fabric sheet and iron on printed side of fabric to heat set the image (do not steam)

**STEP 4.** Rinse fabric sheet in a pan of cold water for 1 minute. Lay flat on a towel and allow to air dry or blow dry.

Applique printed fabric onto material.

Creativity unlimited
